Balanced Energy for Everyone

Realizing California’s Energy Future

CA has ambitious clean air goals but to meet them the challenges are big and complex

Governing Law – SB 100

60% renewable energy by 2030

100% carbon-free energy by 2045

How do we get there?

EES and REGULATORS

must have identified

/ VISION

OUR FUTURE
This is not a case of either/or

We need to work together and embrace a philosophy of

**BOTH + AND**

---

**Here is why:**
- Intermittency Issues
- Storage
- Reliability
- Emerging Markets & Technologies
- Affordability
Limit the options, and you limit the future.

With an integrated approach, we can achieve our goals and preserve choice, while minimizing disruption and cost.
